Subject- Motivation Letter for College Admission

Dear, Charles Stanley

I have written this motivation letter as the explanation source of my motivation which is inspiring me to go on towards seeking admission into this noble University. I would like to make my admission application for the bachelor degree program in the stream of economics with this of my motivation letter and I'm enclosing all my details along with this motivation letter.

I'm _____ and I'm having a very keen interest in the domain of economics particularly about studying the economy of the whole world. It has been my interest right before my secondary higher education and since then I was always looking forward to taking my career ahead in the same direction.

I have come across this of the Noble University and have been very fascinated about the course curriculum and the study environment within the University, which has literally motivated me to make my application for the admission into the University so that I can take a closer step towards my goals.

My passion for the subject has been so extreme that I have performed exceptionally well in this particular subject across my whole academics and I have also participated in the several economics international programs, in which I have received the standing ovation and the excellence certificate.

I'm now looking forward to becoming the world-class economist and I believe that this noble University will shape me into my dreams, for which I'm going to pay the price of the tremendous amount of hard work.

With this I would like to put and end on this of my motivation letter and I believe that my motivation letter would convey the right spirit of motivation from my side for this program of the University. I'm very much positive and looking forward to hearing the same words from the admission authorities of the University.

Regards
Jay Sean
